BUILDING TRUST

A PROFESSIONAL
SOLUTION FOR A PERFECT LOOK.
Sika ComfortFloor®

Incredible but true: Sika ComfortFloor® solutions look this good in real life!

Sika ComfortFloor® is more than just a sleek, stylish floor. It's about how people see and respond to the cool look and the warm touch. Sika's polyurethane liquid applied to floors offers a seamless result – to help realize the most modern creative concepts.

Sika ComfortFloor® is odorless, solvent free and its smooth polyurethane surface makes it anti-allergic as no dust or bacteria can stick to the surface. It's also very easy to clean and maintain, and durable enough to withstand constant wear.

Sika ComfortFloor® ADVANTAGES:

- Unlimited design creativity
- Seamless
- Odorless
- Solvent (VOC) free
- Smooth closed surface makes cleaning easy
- Anti-allergic
- Warm to the touch
- Fire-resistant
- UV stable and colorfast

A TOTALLY NEW LOOK FOR RESIDENTIAL AREAS WITH Sika ComfortFloor®

A home is a family's castle and the floor is an absolutely vital part of creating a comfortable, safe living space. Sika ComfortFloor® offers a whole range of solutions that are warm, durable, and easy to maintain.

Whether the style and statement of the living room, warm quiet of the bedroom or the durability and performance of the bathroom and kitchen, Sika ComfortFloor® offers a unique combination of modern design and absolute livability.

For the home. Sika ComfortFloor® - in virtually any color.

Top left: The seamless, durable style of a Sika ComfortFloor® is ideal for a professional-size kitchen – here a Sikafloor® PS27 System.
Bottom: A modern bedroom with warmth, thanks to Sikafloor® PS25 System.

Left: Stylish elegance for the living room - in virtually any color (here a Sikafloor® PS23 System).
Top: This is more than just a beautiful bathroom; it's Sikafloor® PS23 System.

A RECOGNIZED AND POPULAR SOLUTION FOR RETAIL AND PUBLIC AREAS WITH Sika ComfortFloor®

Sika ComfortFloor® is found in an impressive array of public areas and buildings. Proven for its durability – and good looks – it is also functional and with excellent performance features.

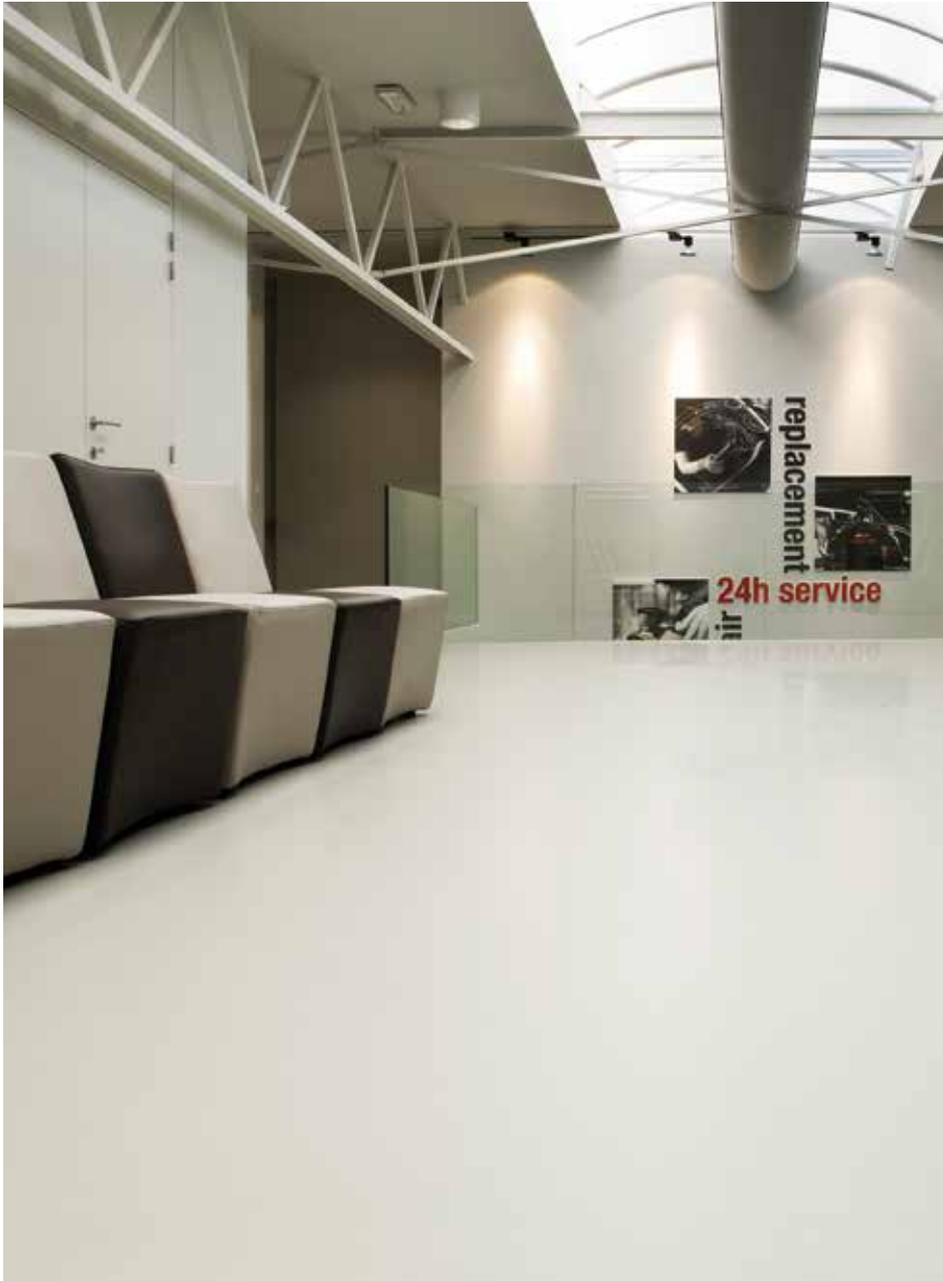

The specific Sikafloor® PS23, PS24, PS 25, PS26 and PS27 systems address defined environmental needs, whether it's reducing impact noise, resistance to moisture and chemicals or long-lasting durability for heavy traffic areas and furniture stress.

TODAY, Sika ComfortFloor® IS FOUND IN MANY TYPES OF APPLICATIONS:

- Offices
- Retail stores
- Hospitals
- Healthcare centers
- Hotels & restaurants
- Museums
- Libraries
- Schools
- Day care facilities
- Colleges & universities
- Sports facilities
- Theaters & film studios

Top: An inviting flooring solution for this travel agency in Stuttgart, Germany. **Bottom:** Business Incubator 27 in Paris, France chose a durable and modern style floor.

Top left: A learning & development center in Hasselt, Belgium needed a floor to complement the contemporary architectural style. **Top:** A hard-wearing and easy-to-maintain floor for a middle school in Namur, Belgium. **Bottom:** The hallway of the school in Weggis in Switzerland opted for a floor with superior acoustics.

Top: Pharmacy in Schoeftland, Switzerland counts on the durability of Sika ComfortFloor®. **Bottom left:** Proven success in retail areas; here in a coffee shop in Waterloo, Belgium. **Bottom right:** Heavy customer traffic is no problem in the Krause store at the Sihlcity mall in Zurich, Switzerland.

Top left: Elegant and modest background colour for exhibited paintings and sculptures for a museum in Hjørring, Denmark. **Top right:** The Sika ComfortFloor® in the Bavaria film studios in Munich, Germany has a starring role and is durable. **Bottom:** A floor built for endurance at the IISPA Sports Centre in Almelo, The Netherlands is color-bright and fade-resistant.

Top left: An ER in York, England with an easy-to-clean and sanitize flooring solution. **Top right:** Versatile performance is perfect for a medical library in Düsseldorf, Germany. **Left:** Looks cool but warm to the touch; in a psychiatric clinic in Pfäfers, Switzerland.

Top: Tough enough for school, in Weggis, Switzerland. **Bottom:** Locker room floor is completely moisture-resistant and looks good; Morschwil, Switzerland.

WHAT CUSTOMERS SAY ABOUT Sika ComfortFloor®

We bought an 80-year old wooden house a few months ago. It looked as old-fashioned as its age. However, after installing Sika ComfortFloor®, the whole space lit up dramatically and became modern and liveable. My wife and I are very proud of the yellow-green color she selected - it fits perfectly with the wooden walls and the stairs!

ANDREAS BOMMER

House owner, Brienz, Switzerland

Daring yet sublime: These three shots show how a modern, colorful flooring solution combines with a traditional - and highly recognizable - exterior to create a modern interior in Brienz, Switzerland; that's SikaFloor® PS 23 System.

ARCHITECTS TALK ABOUT Sika ComfortFloor®

THE LOOK IS INNOVATIVE

I am fascinated by the natural and seamless look of the floor surface. Because the flooring material is available in virtually any color, I feel liberated in my design; I can paint like an artist with a brush and palette! Compared with other floor materials, the look of Sika ComfortFloor® is innovative; there are no repetitive patterns on the floor like with wood, tiles, etc. No joints, just a smooth expanse of color. In my opinion, this is perfect for big space designs.

BING MENG

Main partner and CEO, Chartered Architect
Yuanzheng International Engineering Company,
Tianjin, China

HIGHLY FUNCTIONAL, AND HYGIENIC

This flooring material is ideal for hospitals because it is hygienic and seamless. It's also resistant to water and chemicals – making it easy to clean and maintain. The floor is also durable for heavy traffic areas with lots of people and trolleys, such as a lobby. Besides such functional advantages, we can even design the floor colors, which can make a hospital feel more like a home – and more cheerful.

JIEMING MAXWELL

Chartered Architect, Sydney, Australia

EASY TO APPLY

Ideal for floor renovation. The Sika ComfortFloor® system can easily be applied to many substrates due to its low thickness. Only 3-5 mm are sufficient. Sika system is easy to apply even to singular points such as around the skylight on the ground floor.

BRUNO PLASSAIS

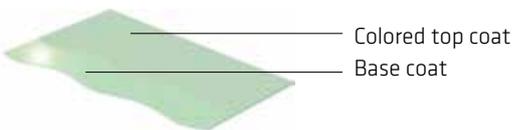

Director, Floor Design, Paris, France

THE TECHNOLOGY BEHIND Sika ComfortFloor®

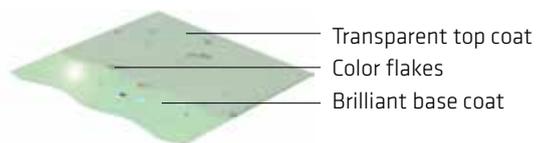

Sika ComfortFloor® systems are available with a range of variable characteristics including acoustics, durability, wear resistance, and surface elasticity. Here is an overview of each system:

Bathroom	**	**	***	***	***

* ADEQUATE ** GOOD *** EXCELLENT

HEALTHY INDOOR AIR QUALITY

Sika ComfortFloor® is odorless during installation and use, and it meets all indoor air quality regulations regarding volatile organic compound (VOC) emissions, which can be harmful to human health and the environment.

SUPERIOR ACOUSTICS

Sikafloor® PS25 and PS26 systems feature an additional acoustic underlayment to help dampen noise. Sikafloor® PS23, PS24, PS25 and PS26 systems all integrate a soft elastic material that reduces echoing, and the disturbing noise of footsteps and falling objects.

DURABLE & ROBUST

Originally designed for commercial applications (shopping malls and hospitals), Sika ComfortFloor® withstands the heavy foot traffic, heavy furniture loads and wear of entryways or hallways in a home. The flooring provides a strong, seamless barrier against water migration and cleaning chemicals. Scratches can be treated with a cleaner or repainted with a new thin layer.

Sika ComfortFloor® systems are installed without any adhesive or underlay, contributing to a lower carbon foot print compared to traditional flooring systems.

THE COLORS OF Sika ComfortFloor®

Ask your Sika representative for the definitive Sika ComfortFloor® Color Chart.

GREEN BUILDING CERTIFIED SYSTEMS

Using Sika ComfortFloor® may contribute points in Green Building Certification systems and for LEED certification. Sikafloor® PS25 and PS26 systems reduce noise and improve the Building Acoustics points in the HQE (France) and the DGNB (Germany) environmental compatibility programs. Sika ComfortFloor® are installed without any adhesive or underlay, contributing to a lower carbon foot print compared to traditional systems such as resilient PVC floor covering.

GLOBAL BUT LOCAL PARTNERSHIP

FOR MORE Sika ComfortFloor® INFORMATION:

WHO WE ARE

Sika AG, Switzerland, is a globally active specialty chemicals company. Sika supplies the building and construction industry as well as manufacturing industries (automotive, bus, truck, rail, solar and wind power plants, façades).
