SCHNEIDER ELECTRIC PROJECT

Project Description:

- Schneider Electric SA is a France-based multinational cooperation that specializes in electricity distribution, automation management and produces installation components for energy management. It is headquartered in Rueil-Malmaison, France and is also based at the World Trade Center of Grenoble.

Special Requirements:

- The Client need Flooring anti dust and Leveled.

Project Requirements:

- The initial floor substrate had unlevelled concrete surface , 3 – 5 mm thickness tolerance .Leveled surface , dust free and smooth finish were mandatory on the project`s requirements

Sika Solution:

- Sika comes with its recommendation to fulfill the required surface preparation , applying the primer layer using Sikafloor 161 to enhance the fully bonding between the concrete substrate and the epoxy body layer .
- Finish the top surface with epoxy self levelling 3mm thickness using Sikafloor 263 SL (A+B+C) .

Products Delivered:

- Sika Floor 161 Primer
- Sika Floor 161 Mortar
- Sika Floor 263 SL

Why Sika:

- Sika is Big Technical Support and Solve unlevelled Flooring

Project Participants:

- Owner: Schneider
- Applicator company: Target
